

Community Architecture

Status Report

January 28 – March 10, 2008

Contents

1. Review progress on each of Community Architecture's FY09 goals.

Expand university community.

Strengthen global community.

Community & Enterprise relationship building.

Community marketing.

Community development & technical achievements.

2. Budget snapshot.

Expand University Community

<u>Goal</u>	<u>Primary</u>	<u>Secondary</u>
-------------	----------------	------------------

University Tour	Jack	Max
------------------------	-------------	------------

Planning is underway. 15-20 school tour begins on March 24, with Jack as the point person.

Seneca College	Greg	n/a
-----------------------	-------------	------------

Deal w/ Chris Tyler to teach Computer Science course around Open Source and Fedora is almost finalized. Contract has been approved by Legal Affairs. Everything looking good.

Develop Open Source Curriculum	Greg	Will Cohen
---------------------------------------	-------------	-------------------

Will's course is already being taught at NCSU, and serves as an example for Seneca College and for faculty that we meet on University Tour. Greg also talking with Liberty University for reworking their entire Computer Science curriculum around open source.

Interns for Fedora	Max	Jack
---------------------------	------------	-------------

Max is getting contracts set aside for interns in Q2. We have a few candidates identified from their pre-existing relationships with Fedora. Jack will find others on Uni Tour. Possibility of a high school intern from NC School of Science & Math.

Strengthen Global Community

<u>Goal</u>	<u>Primary</u>	<u>Secondary</u>
Fedora @ FISL	Greg	David Barzilay
Planning is underway. Half the budget has ben transferred to David Barzilay, who is leading logistics for DVDs, banners, flyers, etc. Greg is planning the trip, to include Fedora Engineers and community leaders, in particular Dennis Gilmore from OLPC.		
Fedora @ LinuxTag	Max	Gerold Kassube
Planning is underway. Max is serving as the liason to a team of community members in Germany who have organized LinuxTag each of the last 3 years.		
Florida Linux Show	Jack	n/a
FUDCon @ RH Summit Boston planning	Max	Paul Frields
Lead global events and Ambassadors	Max	n/a
Max is taking a leadership role in Fedora Ambassadors Steering Committee, serving as their Treasurer and also refining their process and solidifying community leadership roles.		

Community & Enterprise Relationship Building

<u>Goal</u>	<u>Primary</u>	<u>Secondary</u>
Success stories from large RH customers	Greg	Max
We had a win here. Jack posted a blog report about NASA's use of Fedora and RHEL. We are working on turning it into a press.redhat.com story also.		
Development of Func & Cobbler	Greg	Michael DeHaan
Continued development in the community. Target for more formal growth tracking, with metrics, in the next month or so.		

Community Marketing

<u>Goal</u>	<u>Primary</u>	<u>Secondary</u>
-------------	----------------	------------------

Messaging Index	Greg	Max
------------------------	-------------	------------

Messaging index for Fedora is being created in public. Corporate Marketing employees (Colby Hoke and John Adams) have been assisting, along with Fedora volunteers. Goal is to complete as much as possible for use during Fedora 9 GA timeframe.

LWN Subscriptions	Max	Jeff Spaleta
--------------------------	------------	---------------------

As a way of thanking our community volunteers, Fedora has purchased 75 subscriptions to LWN and the Fedora Board is distributing them among our community.

Fedora Wiki Edit Maps	Max	n/a
------------------------------	------------	------------

Created maps showing the number of edits to the Fedora wiki, along with the geographic location of those edits, dating back to October 2007.

<http://fedoraproject.org/maps/wiki-edits/>

Community Engineering & Technical Work

<u>Goal</u>	<u>Primary</u>	<u>Secondary</u>
Produce localized spins of Fedora	Max	n/a
Fedora community is finishing up process, and rough spins are starting to appear.		
Windows program for Live USB creation	Max	Luke Macken
Beta quality code has been developed. Community engineers are working on a GUI.		
Fedora TV	Greg	n/a
Lots of headaches here. Issues around maintainability of code base, storage, etc. Greg is looking into a few options for the best way to move forward, including working with archive.org, which has an entirely open source platform and great licensing terms.		
Fedora start page using Google	Greg	Max
The terms of a revenue-sharing deal with Google were unacceptable to Red Hat's legal team. Until further notice, revenue-generating opportunities with Google are off the table. Looking at Wikia and other opportunities.		

Budget Snapshot

FY09 Q1 (March 2008 – May 2008)

<u>Item</u>	<u>Budget</u>	<u>Spend</u>	<u>Remaining</u>
University tour	\$15,000	\$0	\$15,000
Fedora @ FISL	\$15,000	\$7,500	\$7,500
Fedora @ LinuxTag	\$20,000	\$0	\$20,000
Global events & swag	\$12,000	\$1,045	\$10,955
Fedora TV	\$3,500	\$0	\$3,500
Fedora in the enterprise	\$2,000	\$0	\$2,000
Total	\$67,500	\$8,545	\$58,955
